

FerAppease Bovine 300ml – Product Datasheet

Product Description

FerAppease Bovine 300ml is a non-pharmaceutical calming aid designed to reduce stress in dairy and beef cattle. It contains a synthetic analogue of the Maternal Bovine Appeasing Substance (mBAS), naturally recognised by cattle to promote reassurance and calm behaviour.

How It Works

The active analogue stimulates the vomeronasal organ, helping cattle interpret their environment as less threatening. This reduces anxiety, agitation, and stress-related behaviours during handling, transport, regrouping, and veterinary procedures.

Indications for Use

- Weaning and regrouping
- Transportation and loading
- Market preparation
- Veterinary examinations and procedures
- Environmental or social stress events

Application Method

Apply FerAppease topically:

- Along the bridge of the muzzle
- Behind the poll / upper neck area

Apply 30 minutes before the anticipated stress event. Follow manufacturer dose guidance.

Pack Size

300ml bottle.

Safety Information

- No withdrawal period for meat or milk
- Suitable for food-producing cattle
- Store in a cool, dry place away from sunlight
- Keep out of reach of children

Product Benefits

- Supports calmer behaviour
- Reduces stress■related responses
- Helps improve animal welfare
- Assists safer handling for farmers and staff
